Seeking the Truth

Why seek the truth ?

- Our mind needs its truth
- Emotions do not allow you to make consistent choices
- The one who is rational and helpt is happy
- Knowing our future makes it possible to expect
- If we don't find the answer to our questions we are unhappy and weakly

Seeking the Truth

Seeking the truth is

- Adapting our mind to its surroundings
- To understand these surroundings
- In order to grow and become serene again
- Becoming happy because we satisfy ourselves
- Let searching for the material good
- Through the search for our well-being

Seeking the Truth

Platonic reflection

- Is about making assumptions
- To check them with experiments
- If we seek the truth we get controlled

This is reflecting like civilized person.

Seeking the Truth

What is the economic truth ?

- Our economy is based on energy
- This energy can be unlimited (thorium, helium 3)
- Energy makes it possible to create great works
- These great works allow irrigation
- Which can even irrigate deserts with energy

But someones tell that everything is getting rarer.

Seeking the Truth

What is the social truth ?

- The entertainment society has been the same used for slavery in United States
- Even left-wing parties do not promote writing and personal development
- We are told about the oligarchy's history without telling nations' history, great discoveries and human progress allowed by our creativity

Seeking the Truth

When we know this truth

- We know that we can get to creative goals
- We try to become coherent again
- We want to be in an ideal society
- That we can find

Just look for the truth.
